the path husserl entered upon at the beginning of his philosophical writings turned out to be the beginning of a long tedious way throughout his life he constantly comes to grips with the fundamental problems which set him upon this path beginning with the logical level of meaning laboring through the idealism of the transcendental phenomenology of the period between ideas i to the meditations in search for the ever more originary he finally arrived at the level of the lebenswelt it was this later focus on the ever more originary the source the foundation of meaning which led him finally to the horizon of meaning and the genesis of meaning in the lebenswelt period this later period allows for a quasi wedding of his phenomenology with some adaptation of existentialism but this union called for an adaptation of husserl's logistic prejudice the period of the lebenswelt allows many of the later phenomenologists to speak of the failure of the brackets in their extreme exclusion and to allow for a link between man and his world in the lebenswelt this link is at the source of the ontological investigations and theories which arise from the phenomenological movement however there is the possibility of many tensions in such an endeavor since the study of being can be most abstract and most concrete
